

WATER STRATEGY

The UN estimates **one-third** of the global population currently live in water-stressed regions and nations.

If we don't act, the UK faces a potential water deficit by 800 million to 3 billion litres per day by 2050.

SO WATER ALDI DOING TO HELP?

ALDI'S KEY INITIATIVES

Greener Everyday
Colleague Engagement

Rain/Greywater harvesting at
Distribution Centres

Monitoring Consumption

Water Saving Technology

Courtauld 2030 Water Roadmap

Sourcing project in Southern Spain

ALDI GB / IE have created a Water Strategy outlining the business' commitment and key initiatives to consume water more sustainably within our operations and supply chain.

ALDI'S TARGETS

ALDI GB/IE are committed to:

1. Achieving a 10% relative reduction in operational water use by 2030.
2. Ensuring good water stewardship practices

ALDI'S PROGRESS SO FAR

ALDI GB/IE achieved a relative reduction of **5.6%** (or **c.28 million litres of water**) in 2022 against our 2020 baseline. That's the equivalent of **11 Olympic sized swimming**
