

Everyday Amazing.

ENERGY POLICY STATEMENT

Since 2015, Aldi UK and Ireland have been certified to ISO 50001 Energy Management System, an internationally recognised best practice standard, which drives energy efficiency and helps us to reduce our environmental impact.

At Aldi, we are fully committed to:

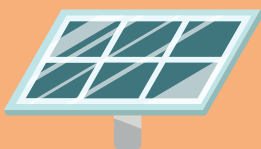

- Continually improving our Energy Management System and our energy performance.
- Meeting our legal and other requirements relating to energy.
- Supporting the purchase of energy efficient products and services.
- Considering energy performance in our design activities and operations.
- Providing all the information and resources required to meet our objectives and energy targets.
- Regularly tracking progress against our energy targets and reviewing these targets annually.

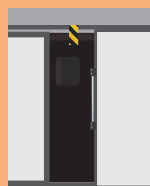

Aldi UK and Ireland's key energy saving measures:

Purchase 100% renewable electricity

Solar panels on c.400 stores and all UK Regional Distribution Centres

CO₂ refrigeration

Heat recovery systems

Driver fuel efficiency training

Roll out of electric vehicle charge points

Roll out of double deck trucks

Employee engagement

Aldi UK and Ireland's objective is to make sustainability affordable to our customers by achieving zero carbon.
